

Dear Sponsor,

Thank you for taking the time to consider sponsoring our local youth swim team. After a 2-year interruption due to Covid we had a very positive return season this past summer. As we prepare for the 2023 season, we are excited to once again offer the Turner Tiger Shark Swim Team to our community's youth and hope to have even more youth involved this summer!

This 6-week program is open to all kids from elementary school through high school and is overseen by the Cascade School District. With a 5-day a week practice schedule and swim meets every Saturday in July, it is both a healthy and positive summer opportunity. Turner Swim Team hosts several meets at The Burkland Pool, including the finals swim meet which consists of 7 other local area teams coming together to compete, right here in Turner.

This program relies solely on registration fees, fundraising, and sponsorships. Sponsorships from businesses and organizations help to offset some of the costs associated with the season's operations, such as, Burkland Pool rental costs, league fees, coaching stipends, t-shirts, & youth awards. All sponsorship funding is directly invested into the Turner Shark Swim Team program and is tax deductible.

Listed below are our current options:

- ☐ \$40-\$150: Sponsor name included on our online sponsors boards, announced during our home swim meets, and printed on the SVSL Finals Heat Sheet.
- ☐ \$150 +: A business provided banner hung during all meets held at Burkland Pool, Sponsor name included in our online sponsors boards, announced during home swim meets, and printed on the SVSL Finals Heat Sheet.
- ☐ T-shirt sponsorship or other sponsorship opportunities: Please contact our team director to discuss other advertising options, such as T-shirt sponsorship, which may still be available.

We greatly appreciate your generosity and continued support for our young local athletes.

Should you have any questions please email turnerswimteam@hotmail.com or contact

our Team Director Paul Sell at (503)508-7726 with any questions.
